DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Sunao et al. JP02-218465.

Sunao et al. disclose a device for applying a foamed hot melt adhesive having a first compression process including a first gear pump (6) and a second compression process including a second gear pump (11), wherein the first gear pump of the first compression process and the second gear pump of the second compression process are driven by drive mechanisms (13,14) independently from each other and rotation frequencies of the first gear pump and the second gear pump, respectively, are set independently and arbitrarily.

Allowable Subject Matter

3. Claims 4-6 are allowed.

Response to Arguments

4. Applicant's arguments filed 4/6/2009 have been fully considered but they are moot in view of the new ground(s) of rejection.
